

# Problem Topic #6: Transportation

- **Context: Distinguish transit, local transport, public transport**
- Bauska has lots of transit – shortest path from Berlin to Helsinki; Mēmele bridge is a choke-point. (Jelgava – alternative path.) Some 17000 vehicles cross the city daily.
- Police/video data.
- Locals prefer using cars too; closing little streets for traffic – not popular.
- Public transportation exists – limited appeal.
- Rail Baltica and other projects/promises.

## **Why a problem**

- Conflicts with other goals (architecture preservation; nice tourism, etc.). Many tourists never get further than K-Circle.
- Congestion and air quality.
